PROFESSIONAL EXPERIENCE

03/06/2020 – present

Antares Vision Group – Technical Support Engineer

- Provided remote technical support to field technicians during commissioning, troubleshooting IT and system-related issues.
- Delivered advanced customer support via ticketing systems and direct calls, ensuring timely issue resolution.
- Supported inspection and traceability systems within industrial environments.
- Assisted in system commissioning and integration with customer IT infrastructure.
- Performed log analysis and root cause investigation to resolve complex technical issues.
- Utilized Elasticsearch and MySQL for data analysis and troubleshooting activities.
- Worked within Linux environments for system diagnostics and log analysis.
- Applied Python and Bash scripting to automate tasks and support operations.
- Collaborated with customers and cross-functional teams to ensure system reliability and minimize downtime.

04/06/2018 – 15/05/2020

Network Operations Engineer (United Nations Project)

Alascom s.r.l, Milano (Italy)

- Managed IT services and ensured operational continuity of network systems.
- Monitored and resolved issues related to network platforms and associated systems.
- Troubleshoot and optimized customer networks to improve stability and performance.
- Identified and analyzed network issues using monitoring tools and performance metrics.
- Ensured compliance with SLAs, KPIs, and customer satisfaction targets.
- Member of the Network Operations Center (NOC) team, providing technical support to agencies and missions.

18/10/2017 – 15/05/2020

Android Developer (Freelancer)

- Designed, developed, and tested Android applications, including UI and core functionalities.
- Ensured applications met performance and quality requirements through testing and optimization.
- Optimized user interfaces for compatibility across multiple systems and devices.
- Implemented secure data storage solutions using Android Keystore for credential management.
- Maintained, debugged, and improved application performance.

27/05/2013 – 27/07/2013

IT Solution

Samalink, Beirut (Lebanon)

- Supported IT solutions and services within a professional environment, gaining hands-on experience in system support and operations.
- Assisted in troubleshooting technical issues and maintaining IT systems.
- Collaborated with team members to support daily IT activities and service delivery.

20/10/2010 – 15/06/2011

PLC Programmer (Diploma Thesis Project)

- Developed strong knowledge of PLC programming, including ladder logic and I/O system architecture.
- Applied troubleshooting skills to ensure efficient operation of industrial machines.
- Programmed PLC systems to execute specific functions based on required outputs.
- Developed reusable ladder logic code adaptable across different machines and systems.

EDUCATION AND TRAINING

15/09/2014–07/04/2017

Master of Science in Computer and Communication Network Engineering (CCNE)

POLITECNICO DI TORINO, Torino (Italy)

Project: Coping with Power Outages in Green Mobile Networks

12/10/2010–20/03/2014

Bachelor of Science in Computer and Communication Engineering (CCE)

ARTS, SCIENCES & TECHNOLOGY UNIVERSITY IN LEBANON (AUL), Saida (Lebanon)

Project: Remote Control & Monitor of Electric Current using Android device

15/05/2009–20/06/2011

Diploma in Computer and Communication Engineering

SIBLIN TRAINING CENTER (STC), Siblin (Lebanon)

Project: Automatic Electric Generator Controller using PLC

Mother tongue Arabic

Other languages

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	C2	C2	C2	C2	C1
Italian	C2	C2	C2	C2	C1

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user

Communication skills

I am confident in my interactions with others and able to communicate effectively with team members to coordinate tasks and achieve shared goals.

Key strengths include:

- Excellent written and verbal communication skills
- Strong ability to understand and resolve technical issues efficiently
- Empathetic listener with persuasive communication abilities
- Comfortable working in team environments and collaborating with others
- Able to work both independently and as part of a team

Job-related skills

- **Technical Support & Troubleshooting:** Advanced troubleshooting of IT systems, network platforms, and customer environments during commissioning and post-deployment phases.
- **Network Operations (NOC):** Monitoring, incident management, and resolution of network and system issues, ensuring service continuity and performance.
- **System & Log Analysis:** Experience analyzing system and application logs to identify root causes and resolve complex technical issues.
- **Databases:** Working knowledge of **Elasticsearch** and **MySQL** for querying, data analysis, and diagnostics.
- **Linux Systems:** Proficient in Linux environments for system navigation, troubleshooting, and log management.
- **Scripting & Automation:** Good experience with **Python** and **Bash scripting** to automate tasks and support operational activities.
- **Commissioning & System Integration:** Supporting system deployment, configuration, and integration with customer IT infrastructure.
- **Monitoring & Performance Analysis:** Use of monitoring tools and performance metrics to identify issues and optimize system/network performance.
- **Customer Support & SLA Management:** Managing support activities via ticketing systems and direct interaction, ensuring SLA/KPI compliance and customer satisfaction.
- **Collaboration & Cross-functional Work:** Working closely with field technicians, customers, and internal teams to ensure system reliability and minimize downtime.

Digital skills

Programming & Scripting:

- Python (basic), Bash scripting, Java, C/C++, C#, HTML/CSS
- Android development (Android Studio)

Systems & Platforms:

- Linux (Ubuntu, Red Hat, Kali), Windows
- Virtualization: VMware, VirtualBox

Databases & Data Analysis:

- Elasticsearch (querying and data analysis)
- MySQL

Monitoring & Network Tools:

- SCOM, HP SIM, HP NNM, SiteScope, Cacti, NetFlow Analyzer
- Wireshark (network traffic analysis)
- ServiceNow, Salesforce, Oracle Siebel (CRM)

Development & Engineering Tools:

- Eclipse, NetBeans, Code::Blocks, Android Studio
- OMNeT++ (network simulation)
